SUBMISSION OF SUBSTITUTE SEQUENCE LISTING

Sir:

Responsive to a teleconference with Examiner Lucas on July 8, 2004, wherein the species election of SEQ ID NO.: 19 was discussed, it was determined that the species election was appropriate. However, upon review of SEQ ID NO.: 3, in particular, modified residue NO.: 17, an error in the amino acid residues was identified. A substitute sequence listing is provided herein which corrects the error detected. In particular, the incorrect residues at Position 17 of SEQ ID NO.: 3 originally read as Pro, Lys or His. These have now been corrected to comply
